CAREER GENAI

One AI mentor. Every career decision.

A personalized education and career guidance ecosystem from Class 6 to placement.

MINI PROJECT PRESENTATION

Why is Career GenAI needed?

Students have information, but not a clear and personalized direction.

Career Confusion

Students often choose streams, courses or careers based on pressure, trends or incomplete information.

Scattered Information

Courses, exams, colleges, fees, preparation resources and job guidance are spread across many platforms.

No Continuous Mentor

A counselor may guide once, but students need support at every stage—from school to placement.

Result

- Wrong career choices and wasted time
- Unclear exam and college preparation
- Weak skill development and poor placement readiness

Edit with WPS Office

Our Solution

Career GenAI creates one connected journey instead of separate tools.

Career GenAI is an AI-powered web platform that:

- Understands the student's class, interests, skills and goals
- Explains available courses and professions
- Creates a personalized subject, exam and college roadmap
- Supports daily learning, entrance preparation and placement
- Guides students and parents through voice and chat AI

Edit with WPS Office

Who will use it?

The platform supports the complete student life cycle.

1

Class 6–10

Explore interests, subjects and careers

→

2

Class 11–12

Choose stream, exams and colleges

→

3

Entrance Aspirants

JEE, NEET, CUET, NDA and more

→

4

College Students

Semester study, skills and projects

→

5

Placement Stage

Resume, interview and company fit

Edit with WPS Office

How will the system work?

A simple personalized workflow for each student.

1. **Create Profile** — Class, stream, interests, marks and goal
2. **AI Assessment** — Interest, aptitude and skill-gap analysis
3. **Career Roadmap** — Courses, subjects, exams, colleges and timeline
4. **Daily Preparation** — Notes, quizzes, resources and progress tracking
5. **College & Placement** — Projects, resume, mock interview and job readiness

Edit with WPS Office

Module 1 — Career, Course & Profession Explorer

The student can understand what each career actually requires.

Course Information

Eligibility, duration, important subjects, required skills, entrance exams and career outcomes.

Profession Information

Nature of work, required abilities, job roles, career growth, salary range and future demand.

Personalized Recommendation

AI matches the student profile with suitable fields and explains why each option fits.

Example: A student interested in computers and problem-solving

AI may recommend Computer Science → required subjects → entrance options → suitable colleges → skills to build → possible roles such as software engineer, data analyst or cybersecurity professional.

Edit with WPS Office

Module 2 — Exam, College & Resource Guidance

Career GenAI converts a goal into an actionable preparation plan.

Entrance Exams

JEE, NEET, CUET, GATE, CAT, CLAT, NDA and government exams

Pattern • syllabus • subject weightage • eligibility • form dates

College Comparison

Courses offered, fees, facilities, placements, location and student reviews

AI helps shortlist colleges according to profile and budget

Learning Resources

Books, handwritten notes, tutors, platforms and batches

Ratings, previous results, fees, student feedback and suitability

Important: The system recommends and compares—it does not blindly promote one coaching platform.

Edit with WPS Office

Module 3 — AI Study Mentor

The AI behaves like a continuous mentor, not only a chatbot.

Personal Study Plan

Daily and weekly targets based on available time and exam date.

Smart Learning

Notes, short and long questions, quizzes and revision tests.

Progress Analysis

Identifies weak topics and recommends the next best activity.

Voice Mentor

Explains topics, reads roadmaps and guides both student and parents.

Parent View

Simple progress reports, important deadlines and guidance for supporting the child.

Edit with WPS Office

Module 4 — College Study & Placement Preparation

The platform continues supporting the student after admission.

Semester Support

Syllabus roadmap, notes, important questions, quizzes and exam preparation.

Project Mentor

Suggests suitable projects, required technologies, development stages and documentation.

Resume & Company Fit

ATS-style resume analysis, missing skills and role-specific scorecard.

Mock Interview

Technical, HR and communication practice with AI feedback.

Edit with WPS Office

Where is Generative AI used?

AI personalizes, explains and generates guidance at every stage.

Profile Analysis

Summarizes interests, strengths and gaps

Roadmap Generation

Creates personalized steps and timelines

Doubt Support

Explains concepts in simple language

Content Generation

Creates quizzes, questions and revision plans

Resume Feedback

Suggests role-specific improvements

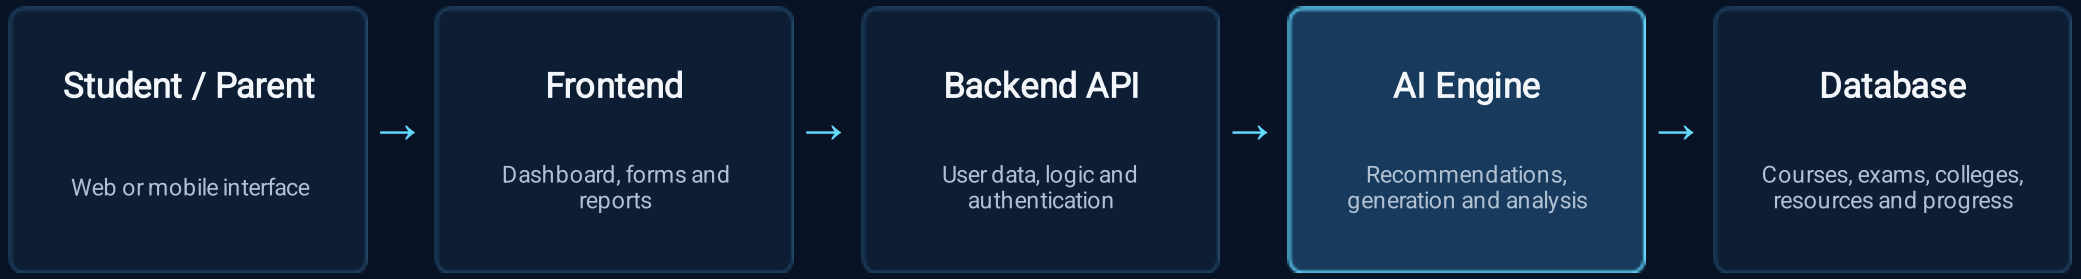

Mock Interviews

Generates questions and evaluates answers

Edit with WPS Office

System Architecture

The platform combines verified data with AI-based personalization.

External verified sources: official exam portals • college websites • course providers • trusted educational datasets

Mini Project Scope — What we will actually build

The startup vision is large, but the college MVP will remain realistic and demonstrable.

Working MVP

- Student profile and interest form
- AI-based career recommendation
- Career roadmap for selected domains
- Exam and college information pages
- Quiz and progress dashboard
- Basic resume analyzer and mock interview demo

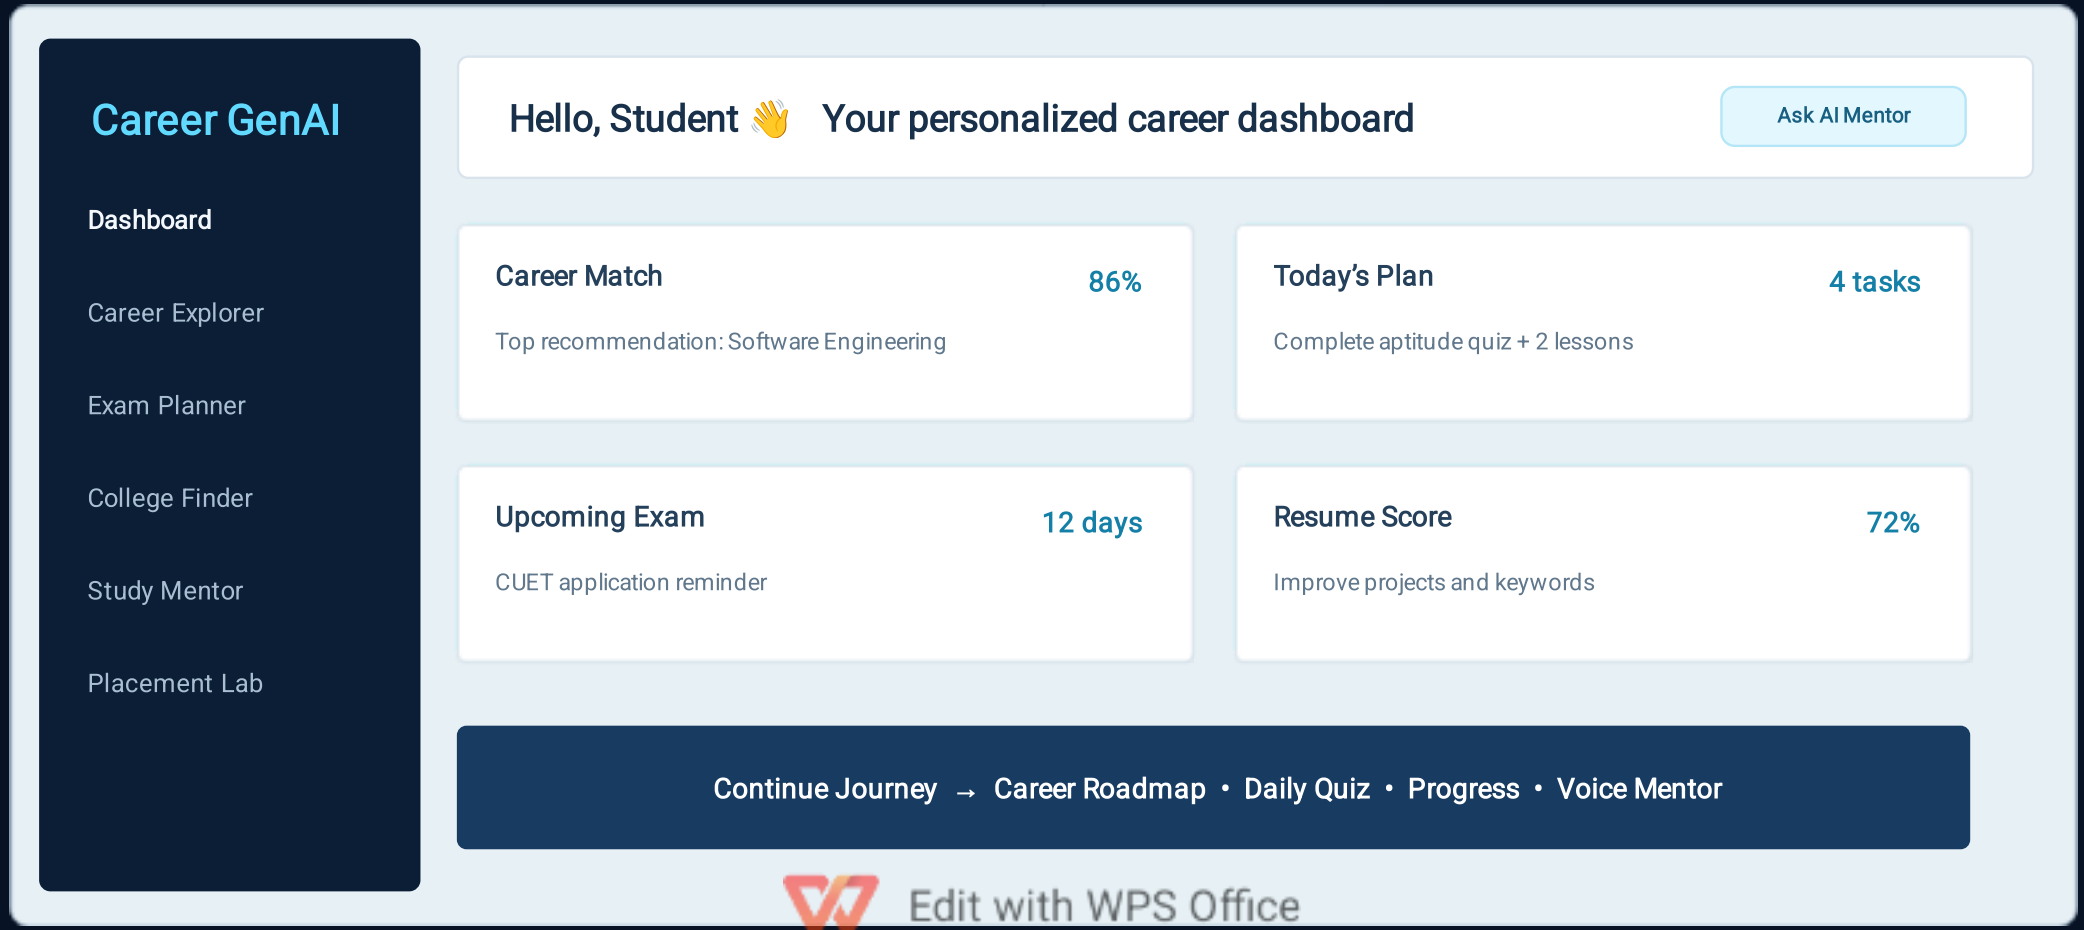

Future Expansion

- All global courses and professions
- Real-time form and deadline notifications
- Verified coaching comparison and batch analytics
- Advanced parent voice assistant
- Full placement and job matching ecosystem
- Multilingual mobile application

Frontend Demo & Conclusion

A clickable concept demonstrates how the proposed system will look and feel.

Frontend Concept Demo

Open the attached HTML file to view a responsive Career GenAI landing page and dashboard concept.

OPEN FRONTEND DEMO

Career GenAI connects career discovery, learning, exams, colleges and placement through one personalized AI mentor.

Main Value

- Clarity for students
- Confidence for parents
- Continuous guidance
- Better career readiness

Thank You
